General Worthy Foreman Bishop Deplore the Advent of Labor-Saving Machinery. Committees of Knights Appointed.

Washington, Nov. 13.-The chief public interest in the meeting of the Knights of Labor today was in the addresses of General Master Workman Sovereign and General Worthy Foreman Michael J. Bishop. Much of Mr. Sovereign's address was devoted to the ulleged treachery of those who headed the revolt against the officers of the order during the past year. He reviewed what he termed their "devilish treachery" and their efforts to "disrupt the order." He claimed that they had exhausted all their power maligning the general officers through the columns of the press and discouraging the loyal and confiding members through secret agencies. They had publicly boasted that 65,000 members had joined their revolt. He explained the methods which had been used to weed out the district assemblies and said the assembly for the first time presented to the world a solid and unbroken front, battling for the brotherhood of man and the free- lod. m of labor from the thraldom of

The address of General Worthy Fore-man Bishop also dealt with the attacks made upon the Knights of Labor by the revolting members, but contained little of general importance beyond an apcause of the abnormal progress made in response to a congratulatory concentrated wealth and the fact in reference to the latter's determ that it is constantly more firmly en-trenching itself behind barriers which

Rumors About the State Department at Washington Bode Ill to American Missionaries and Teachers Within the Sul-Francisco will Undertake in Turkish Waters the Protection of American Citizens-Soltan Makes it Warm for Unwelcome Consular Officers.

Washington, Nov. 13.-Disquieting rumors regarding the security of Christian teachers in Turkey between Tre bizond and Erzeroum were about the state department today, but the officlais refused to allay the popular apprehension. There is ground for the belief that the department has heard from Minister Terrell today and that his advices, while showing that a perlious state of affairs confront the American missionaries and teachers in that section, do not state that actual murders have been reported to him. The department also has a most energetic officer as near to the scene of the rumored trouble as a war ship can get, in the person of Captain O'Neill of Marblehead, and up to the close of the office hours he had made no report of a massacre, as he would undoubtedly have done had the news reached him. The nearest state department represen-tative is United States Consol Jewett at Sivas, but he has also been silent.

For the very reason that this section of Turkey, including important American missions, has all along been without any consular office representing the United States, congress at its last sen-sion provided for the establishment of two consulates therein, one at Ezeroum and another at Harpoot.

DISCOURAGED CONSULS. The state department several months

ago sent to Turkey two experienced men from Washington to open the consulates there. But the Turkish government has persistently declined to issue exequateurs to them so they have been unable to exercise consular functions. These men, Messrs, Chilton and Hun-ter, were in Erzeroum when the last massacre occurred there and were compelled to seek safety in the British con-sular office during the rioting. Since then, as their lives were being needless-ly jeopardized and there was no hope of securing recognition as consuls, state department has seen fit to au-thorize their retirement from the scene of danger and at last accounts they were in Constantinople with every indi-cation that they would be ordered back to the United States and the project of

With those tko vessels present it is felt that out government will have done all possible to protect the Americans in the interior of Turkey, taken in connection with a most vigorous notice from Minister Terrell that the United States will hold the porte responsible for any injury they may sustain.

In the present stage of affairs the navy department will not add to the strength of the squadron now in Turkish waters, which consists of the San Francisco and the Marblehead. It is considered that these two are ample to protect American residents in Turkey, even in the event of actual hostilities, and to assemble a strong naval force

San Francisco, Nov. 13.-Although Japanese officials have denied that the mikado will spend \$200,000,000 in warships, it is reported on advices by the steamer Coptic today that ten vessels are to be built abroad, and that possibly the orders for them will be equally divided among the shipbuilders of England, France, Germany, Italy and the

United States. Count Okuma is in favor of such a distribution of prizes and says in relation to orders for men-of-war from abroad that it would be advisable to give the contracts to ony country that is capable of constructing good vessels of new style, without limiting orders to anyone in particular. Leaving aside England and France, which are known as maritime provinces, the country should pay regard to Italy, although her shipbuilding capacity is not much known to Japan. She is the power which originated the idea of

construction of war vessels. Count Okuma further says, "next we should look to the United States, the caused other incendiary fires in Furtonville. He spent a fortune in politics and contracted habits which led to his downfall.
